      Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                            European Bioinformatics Institute.
                                                                                                                                                                                                                                                                                                                                                                                                  FUNCTION: SHOWS ACTIVITY ON LICHENAN, BETA-GLUCAN AND LAMINARIN BUT NOT ON CMC CELLULOSE OR XYLAN. THE ENZYME HAS A TEMPERATURE OPTIMUM OF 85 DEGREES CELSIUS AND A HOPTIMUM OF 7.0.
CATALYTIC ACTIVITY: HYDROLYSIS OF 1,4-BETA-D-GLYCOSIDIC LINKAGES IN BETA-D-GLUCANS CONTAINING 1,3- AND 1,4-BONDS.
SIMILARITY: BELONGS TO FAMILY 16 OF GLYCOSYL HYDROLASES.
                                                                                                                                                                                                                                                                                                                                SWISS-PROT entry is copyright. Insect Biochem, Mol. Biol. 28:827-837(1998).
-I- FUNCTION: MAY BE INVOLVED IN THE INSECT-IMMUNE PROTEIN. IT PRESENT STRONG AFFINITY TO THE CELL WALLOF GRAM-NEGATIVE BACTERIA.
-I- SUBCELLULAR LOCATION: SECRETED.
-I- DEVELOPMENTAL STAGE: EXPRESSION STARTS A FEW MINUTES AFTER AN INUTRY OR MICROBIAL CHALLENGE THEN STAYS RELATIVELY HIGH FOR 12
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               SEQUENCE FROM N.A.
